Competency Assessment Program – Instrument-Specific Observation Checklists

Instrument-Specific Observation Checklists are provided by manufacturers

Only Competency Assessment Program gives you immediate access to a printable inventory of Instrument-Specific Observation Checklists. More than 130 checklists supplied by manufacturers are available for competency assessments or training.

More about checklists

When you observe an employee using an instrument, you'll enjoy the confidence that comes from knowing you're using a checklist developed by the manufacturer just for that instrument. After observing your employee, the checklist completion feature makes it a snap to record the results online.

Checklists include graphics and charts, PDF and Word documents, and web links with valuable information about specific instruments. New instrument-specific checklists are continually being added.
